## 2PSS60A25

Solid State Relays
3-Phase with Integrated Heatsink

- 2-pole AC switching solid state contactors
- Product width 2.13" ( 54 mm )
- Rated operational voltage: 600 VAC
- Rated operational current: up to 25 AAC
- Control voltages: 20-275 VAC (24-190 VDC)
- 1,800 A²s for $\mathrm{l}^{2} \mathrm{t}$
- Motor ratings up to 9 kW / 10 HP @ 600 VAC
- Integrated varistor protection on output
- UL, cUL Listing
- 100 kA Short Circuit Current Rating according to UL 508
- DIN or panel mount
- RoHS compliant

## Product Description

This product is intended to replace mechanical contactors especially when switching is frequent.

Switch ON occurs at the voltage zero cross and switch OFF occurs at the current zero cross. Apart from resistive and slightly inductive loads, the 2PSS60A25 is certified for motor switching with associated motor ratings. Varistors are integrated for output overvoltage protection. A green LED gives indication of control voltage presence.

Specifications are at a surrounding temperature of $25^{\circ} \mathrm{C}$ unless otherwise specified.

## General Specifications

| Latching voltage (across each pole L-T) |  | 2PSS60A25 |
| :---: | :---: | :---: |
|  |  | <20V |
| Operational frequency range |  | 45 to 65 Hz |
| Power factor |  | $>0.5$ at rated voltage |
| CE marking |  | Yes |
| Touch protection |  | IP20 |
| LED status indication |  |  |
|  | Control ON | Green, full intensity |
| Pollution degree |  | 2 (non-conductive pollution with possibilities of condensation) |
| Over-voltage category |  | III (fixed installations) |
| Isolation |  |  |
| Input \& Output to Case Input to Output |  | 4000 Vrms 4000 Vrms |
| Output Voltage Specifications |  |  |
|  |  | 2PSS60A25 |
| Operational voltage range, Ue |  | 42-600 VAC -15\% / +10\% on max |
| Blocking voltage |  | 1200 Vp |
| Internal varistors (across each pole) |  | 625 V |

Output Specifications: 2PSS

|  | 2PSS60A25 |
| :---: | :---: |
| Rated operational current per pole ${ }^{7}$ |  |
| AC-51 @ Ta=25 ${ }^{\circ} \mathrm{C}$ | 32 AAC |
| AC-51 @ Ta=40 ${ }^{\circ} \mathrm{C}$ | 27 AAC |
| AC-53a @ Ta=40 ${ }^{\circ} \mathrm{C}$ | 11.5 AAC |
| No. of motor starts ${ }^{8}$ (x: 6, Tx: 6s, F: 50\%) @ $40^{\circ} \mathrm{C}$ | 30 |
| Minimum operational current | 250 mA |
| Rep. overload current (Motor rating) UL 508: $\mathrm{Ta}=40^{\circ} \mathrm{C}$, $\mathrm{t}_{\mathrm{oN}}=1 \mathrm{~s}, \mathrm{t}_{\mathrm{OFF}}=9 \mathrm{~s}, 50$ cycles | 61 AAC |
| Maximum transient surge current $\left(I_{\text {TSM }}\right), t=10 \mathrm{~ms}$ | 600 Ap |
| $1^{2} \mathrm{t}$ for fusing ( $\mathrm{t}=10 \mathrm{~ms}$ ) Minimum | $1800 \mathrm{~A}^{2} \mathrm{~S}$ |
| Critical dv/dt (@ Tj init = 40 ${ }^{\circ} \mathrm{C}$ ) | 1000 V/us |
| 7: Refer to Derating Curves <br> 8: Overload cycle definition, $x$ : multiple of $A$ |  |

Motor Ratings: HP (UL 508) / kW (EN/IEC 60947-4-2) @ 40

2PSS60A25

| 115 VAC | 230 VAC | 400 VAC | 480 VAC | 600 VAC |
| :---: | :---: | :---: | :---: | :---: |
| $11 / 2 \mathrm{HP} / 1.1 \mathrm{~kW}$ | $3 \mathrm{HP} / 3.0 \mathrm{~kW}$ | $5 \mathrm{HP} / 5.5 \mathrm{~kW}$ | $71 / 2 \mathrm{HP} / 5.5 \mathrm{~kW}$ | $10 \mathrm{HP} / 9.0 \mathrm{~kW}$ |

## Control Specifications (A1, A2)

|  | 2 2PSS60A25 |
| :--- | :--- |
| Control voltage range, Uc | $20-275$ VAC, $24(-10 \%)$-190 VDC |
| Pick-up voltage | 20 VAC/DC |
| Drop-out voltage | 5 VAC/DC |
| Maximum reverse voltage | - |
| Maximum response time | 2 cycles @ 230 VAC / 110 VDC |
| Input current @ $40^{\circ} \mathrm{C}$ | See diagrams below |

| 0.15-30 MHz | Class A (Industrial) with filters - see filter information | 30-1000 MHz |  |

Note:

- Control input lines must be installed together to maintain products susceptibility to Radio Frequency Interference.
- Use of AC solid state relays may according to the application and the load current, cause conducted radio interferences. Use of mains filters may be necessary for cases where the user must meet E.M.C requirements. The capacitor values given inside the filtering specification tables should be taken only as indications, the filter attenuation will depend on the final application.
- This product has been designed for Class A equipment. Use of this product in domestic environments may cause radio interference, in which case the user may be required to employ additional mitigation methods.
- Surge tests on 2PSS60A25 models were carried out with the signal line impedence network. In case the line impedance is less than $40 \Omega$, it is suggested that AC supply is provided through a secondary circuit where the short circuit limit between conductors and ground is 1500 VA or less.
- Performance Criteria 1 (Performance Criteria A): No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (Performance Criteria B): During the test, degredation of performance or partial loss of function is allowed. However, when the test is complete the product should return operating as intended by itself.
- Performance Criteria 3 (Performance Criteria C): Temporary loss of function is allowed, provided the function can be restored by manual operation of the control.

## Connection Diagram

## Installation Instructions

## Short Circuit Protection

Protection Co-ordination, Type 1 vs Type 2:
Type one protection implies that after a short circuit, the device under test will no longer be in a functioning state. In type 2 co-ordination the device under test will still be functional after the short circuit. In both cases, however the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors or terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in the table hereunder are suitable for use on a circuit capable of delivering not more than 100,000A ms Symmetrical Amperes. 600 Volts maximum when protected by fuses. Tests at 100,000A were performed with Class J fuses, fast acting; please refer to the tables below for maximum.

Co-ordination type 1 (UL 508)

| Part No. | Max. fuse <br> size [A] | Class | Short circuit <br> current [kArms] | Voltage [VAC] |
| :--- | :---: | :---: | :---: | :---: |
| 2PSS60A25 | 30 | J | 100 | Max. 600 |
